Product Specifications

Touch-all-in-one Kiosk
32 inch

Overview:

Smart Digital Kiosk is a small device that is installed in a public space where people can get information or services. A smart digital kiosk can have one side or multiple side views and people can get information and sometimes services. Meanwhile, we can find a digital kiosk in various places in Nepal too. People can interact with the digital kiosk and get services without the help of a third party. We can find these types of kiosks, particularly in public places like airports, municipalities, governmental offices, restaurants, hotel lobbies, etc. Customers can choose their service and get service on their own with the help of this digital kiosk. People have complete control over the service. They get and can be fully satisfied as they are the ones to choose the choices and have complete control from start to finish.

Benefits of Smart Digital Kiosks:

- Firstly, helps reduce business costs.
- Improves business efficiency
- Boost's company sales
- Allows real-time communication
